

## Press Release

Tomar Electronics offers Custom LED Lighting Design and Manufacturing Services

Gilbert, AZ – January 20, 2009 – Tomar Electronics, Inc. has announced Tomar Custom Design<sup>SM</sup> a service providing design and manufacturing of LED and strobe based lighting solutions for OEM partners. For 40 years Tomar Electronics has manufactured its own brand of lighting products for emergency warning, industrial safety, and machine vision applications. Tomar Custom Design<sup>SM</sup> now provides this design and production experience to other manufacturers looking for state-of-the-art lighting solutions.

“Tomar Custom Design offers a unique value-added service for our customers,” said Scott Sikora, Tomar’s Chief Executive Officer. “Combining our reservoir of intellectual property and our proven proficiency in optical, electrical, mechanical, thermal, and software design with our efficient manufacturing facility, we can offer partners volume production of their custom products often with no design or startup costs.”

Tomar Electronics, Inc. has completed projects with OEMs world-wide ranging from strobe camera flash units for illuminating vehicle license plates for toll enforcement to upgrading legacy incandescent and fluorescent lights to more efficient and greener LED technology. Most recently, Tomar designed and produced 24 LED lighting modules for the emergency warning, spotlight, and tail-light functions on partner Carbon Motors Corporation’s ([www.carbonmotors.com](http://www.carbonmotors.com)) E7 police cruiser concept vehicle now touring the United States.
