

TSYS-I Truck Strobe System

Warning Lights and Traffic Directing Arrows

The TSYS-I features "WP" waterproof lamps, power supply, and cabling system for lighting the rear of municipal trucks and snow plows. The model 772P-1228-WP strobe power supply is potted and has waterproof connectors, and will operate on both 12V and 28V automotive systems. The lamps are hermetically sealed and have chrome coated reflectors for long life. The RECT-37-BOX units are fabricated from heavy steel plate welded to form a watertight box, prime painted, and furnished with gasket.
